# Example iPhone Applications

## Communication/Messaging Tools

Stay connected with customers, colleagues, and other key contacts with an iPhone messaging solution. From chat rooms and conference calls to email management, we can help coordinate your communications all from your iPhone.

## Work Time Trackers

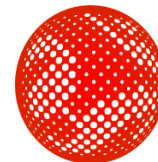

Enable your team to stay connected and work more productively with your existing CRM and back office systems now accessible on iPhone. Mansa Systems can streamline your task scheduling, tracking, and expense management for maximum efficiency.

## Social Networking

Let us help you create your own social or business network. With your own custom application, you can organize your network, search for contacts, invite people, and even track their position using GPS.

## Media Applications

iPhone is the ideal platform for your specific media needs. We can help you with both audio and video applications that can be used in countless ways including employee and customer training and sales presentations.
