

“Mission Asset Fund” builds La Red portal, <http://red.force.com> for business partners to make the client application entry and client referrals easy.

Project Overview

Mission Asset Fund wanted to make the intake form accessible to MAF partners via a web portal. The intake form in the web portal must utilize the same scoring mechanism in MAF's salesforce.com instance to produce a list of services clients might qualify for. MAF wanted the portal to consist of the following three outwardly facing web-pages: portal entry page, intake form, results page.

Solution

- ✓ Designed & developed <http://red.force.com> website on force.com platform using partner portal, visual force, sites, xhtml, css, standard security and sharing features, custom objects.
- ✓ Scoring engine logic has been rebuilt completely.
- ✓ Developed a public facing intake form for MAF partner organization

Customer Voice

As a small non-profit organization with little experience with Salesforce.com, it was indeed a pleasure to work with everyone at Mansa Systems in developing our project. Mansa Systems' team was extremely professional, inventive and insightful in helping realizing our vision. I fully recommend any organization to work with Mansa Systems' team.

Jose Quinonez, Director at Mission Asset Fund
